

1. Tgei diember drova ei per che l'equaziun seigi gesta?

a $12 \cdot (12.1 - \underline{\hspace{2cm}}) = 1.2$

b $51 : \underline{\hspace{2cm}} + 3 : 2 = 10$

c $5.5 : (55 : (55 : \underline{\hspace{2cm}})) = 0.5$

d $9 - 9 \cdot 0.9 = 3 - \underline{\hspace{2cm}} \cdot 0.3$

e $4.4 = (6 \cdot \underline{\hspace{2cm}} + 2.2) : 8$

f $(\underline{\hspace{2cm}} : 7 - 1.3) : 4 = 3.25$

2. Reparta ils quater diembers indicai ellas parts libras dallas equaziuns.
Mintga diember astga vegnir duvraus mo ina gada.

a

4.6	5.4	6.4	7.5
-----	-----	-----	-----

$7.8 + \underline{\hspace{2cm}} = 9.6 + \underline{\hspace{2cm}}$

$7.3 - \underline{\hspace{2cm}} = 9.4 - \underline{\hspace{2cm}}$

b

1.4	1.5	1.6	1.7
-----	-----	-----	-----

$7 \cdot \underline{\hspace{2cm}} + 4 \cdot \underline{\hspace{2cm}} = 18$

$5 \cdot \underline{\hspace{2cm}} + 8 \cdot \underline{\hspace{2cm}} = 19$

c

5.5	6.5	7.5	8.5
-----	-----	-----	-----

$\underline{\hspace{2cm}} \cdot 6 + \underline{\hspace{2cm}} = 50.5$

$\underline{\hspace{2cm}} \cdot 8 + \underline{\hspace{2cm}} = 60.5$

d

3.1	3.2	3.4	3.5
-----	-----	-----	-----

$\underline{\hspace{2cm}} + 5 \cdot \underline{\hspace{2cm}} = 20.2$

$20.6 - 5 \cdot \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$
